Evanston, IL | 650-283-0623 | stanleywan2029@u.northwestern.edu | LinkedIn | Website

EDUCATION

Northwestern University, Evanston, IL **Graduation Date: Jun 2029**

B.A. Cognitive Science | Segal Design Certificate, CS Minor (intended)

Relevant Coursework:

Design Thinking & Doing, Multivariable Differential Calculus, Intro to Statistics & Data Science, Fundamentals of Computer Programming 1, Principles of Entrepreneurship, Learning, Representation & Reasoning

EXPERIENCES

Rising Team **Jul 2026 - Sep 2026**

Product Design Intern Menlo Park, CA

- Partnered with the Chief Design Officer to craft a team-building kit, "AI Fluency for Humans," empowering employees to delegate routine tasks to AI while reinforcing their own irreplaceable capabilities. Met weekly with the design team to align on product strategy and roles.
- Brought the entire kit to life in Figma, crafting each frame's layout, features, and color palette. Spearheaded the creative iteration for a new feature enabling teams to summarize their responses through Rising Team's AI agent, Arti.
- Designed a delegation-vs-judgment framework that helps teams decide which tasks to hand off to AI and which to keep human, reframing AI adoption as a way to augment skills rather than replace jobs.

BorderX Lab **Jun 2026 - Sep 2026**

Digital Marketing Intern Sunnyvale, CA

- Managed social content across TikTok (**23K** followers) and YouTube (**2.5K** subscribers), crafting carousels in Canva and posting 2-3 times weekly while spearheading creative ideation around trending cultural moments. Grew average TikTok views by **10x**, tripled watch time, and lifted full-video completion rate from **~6%** to **~30%**.
- Researched how TikTok, YouTube, Reddit, and Google algorithms diverge amid the shift toward AI-generated search summaries, then built a long-tail keyword framework and an EEAT content plan modeled on category leaders like REI, earning leadership approval for execution.
- Rebranded BeyondStyle's blog as "The Closet," diagnosing why the site's AI-generated articles were underperforming and reimagining the layout in Figma for a more editorial, trustworthy reading experience. Wrote **3** articles weekly, testing general vs. specific topics to uncover the angles that drove the most traffic.

JukeBox.am **Sep 2026 - Present**

Campus Ambassador Evanston, IL

- Met weekly with the Director of Growth and the Marketing and Development teams to brainstorm on-campus growth strategies for a music-rating app founded at Northwestern's Garage.
- Wrote strategy briefs for each growth idea, mapping out the execution plan and logistics needed to bring it to life on campus.
- Planned and ran the app's first outreach event at the Norris University Center, handling communication and setup; engaged with students over **4** hours and drove **hundreds** of new downloads.

Global Research and Consulting Group (Kellogg) **Oct 2026 - Present**

Insights Editor Evanston, IL

- Produced articles, podcasts, and newsletters for GRC's Insights branch that highlight client projects, explore emerging trends, and evaluate key global issues for a student and professional audience.

PROJECTS

Limitus Senior Engineering Project **Jan 2025 - May 2025**

Lead Designer Portola Valley, CA

- Researched TFCC anatomy and wrist biomechanics, conducting market analysis to pinpoint target patient demographics.
- Led an iterative product design process across **5** prototypes using medical-grade materials, drawing on feedback from interviews with **3** industry experts to sharpen anatomical understanding and optimize comfort and functionality.
- Secured Top Shelf Orthopedics' GM as a mentor to streamline development, then presented the final product to an academic panel.

Glodesk **Sep 2025 - Dec 2025**

Product Designer Evanston, IL

- Collaborated in a team of **5** to reimagine lecture hall and workspace seating across Northwestern University's campus.
- Sketched initial concepts by hand and prototyped ideas with foamcore models, then used Vizcom to render a realistic visual of the final seating unit, complete with a foldable desk, borderline lighting, and a cupholder.
- Designed an interactive mobile app in Figma, linked to the desks' lighting, to help students and professors boost class engagement.

SKILLS & TOOLS

Design: Figma, Illustrator, Photoshop, Fusion, Rhino 7, User Research, Prototyping, Design Thinking, 3D Printing

Content & Growth: SEO/GEO Research, Content Strategy, Canva, Copywriting

Programming Languages: Python, Java, R, Racket
